NATHA

September 2023 Press Release

Galvanized by the Surrealist master Rene Magritte's statement: "Art evokes the mystery without which the world would not exist," Thai artist, Natha, explores the boundaries of the world through surrealist reveries. Paradoxically intermingling images of humankind and nature, she intertwines one image with another. Re-conceptualizing our world, Natha creates a new visual syntax which draws inspiration from the mysterious realm of nature. Her labyrinthine paintings are portals to a cerebral vision, as fantasy opens doors to phantasmagoric worlds where figures and landscapes are fully imbued with divine imagination. Not endeavoring to depict things as they are in this world, Natha encapsulates what she feels or imagines they might be in some other world. Free of boundaries, unexpected results produce wildly imaginative characters and whimsical gestural creatures, who convey a sense of the mystery of life.

Blending the fantastic with the real, Natha's magical oeuvre articulates the vortex of inner visceral human emotion. Her dream-like forms conjure mystical apparitions which evoke a spellbinding sense of intrigue and fantasy as they metaphorically transcend the distractions of everyday life. Kinetic and gestural, her unique artistic vision explores the chimerical interaction of humans' fanciful wonderment with the natural world. Stunning and clever, her subject matter consists of both figurative silhouettes and sublime vistas which are transfigured through the unbridled depths of the imagination, where creativity reigns supreme and exhorts fantastical newfound imagery. Striking and sophisticated, her visually stirring otherworldly compositions breathe life into her enchanted dream-like dioramas.

Interested in expressing the natural contradictions that arise during creation and the epic journey, Natha's palette investigates a wide range of hues, juxtaposing and intermixing to create expressive, organic forms.. A marriage of organic line work and opulent saturation reflect brilliant energies of rekindled coloration. Dramatic chromatic tones are illuminated by stark lighting, which heightens the visceral quality of her expressionist emotional vistas. Achieving a full spectrum of dazzling hues, Natha's palette showcases the mastering of her medium. Replete with the fantastic, her unexpected personal touches of pattern and transparency elevate the colorific elements of the surreal into the sublime.

Exceeding human limitations by expressing the mysteries of life, Natha's series elicits the awe-inspiring powers and beauty of our expansive universe. Evocatively expressive, Natha's art magnetically draws viewers inward, inviting intellectual and emotional contemplation. Free of boundaries, she articulates the essence of emotion and celebrates the human spirit. Born and residing in Thailand, this gifted, global, award-winning artist's mesmerizing paintings are acclaimed internationally. Amsterdam Whitney Gallery is proud to shine the spotlight on this rising star.
